

The **plus** 
makes the
difference 
 

CIRCULAR CONNECTORS M8 TO M40

Whether power or signal connectors, Industrial Ethernet or customer-specific special applications – HUMMEL offers the right solution for every requirement.

CABLE GLANDS M16 TO M63

A huge portfolio of cable glands for industrial applications. High quality materials and innovative technology guarantee a quality which meets the highest demands.

THE PLUS MAKES THE DIFFERENCE

Under the motto „The **plus** makes the difference“ we stand as a service oriented and innovative partner for smart and reliable connections – both technically and personally.

The focus is not only on our products, but above all on what makes us special: our added value. Because we offer more than just outstanding components – we deliver real solutions, designed in partnership and implemented in a practical manner.

The **plus** makes the difference

AN EQUATION THAT ADDS UP

Many years of experience and top performance in production at our locations in Germany deliver the product.

Plus, there is added value that comes from our know-how and our company philosophy.

Together, this results in four individual added values that really help our customers move forward.

Components + Certification

Global compliance

We provide you with all relevant documentation for our connectors and cable glands, enabling you to successfully market your products worldwide.

Components + Anticipation

Competitive edge

We develop components tailored to your needs – enabling you to gain a competitive edge.

Components + Availability

Reliable partnerships

Based on our high level of production capabilities we keep your projects running – even when supply chains are under heavy strain.

Components + Sustainability

Shared responsibility

We are committed to sustainable production and operation – and assist you in acting responsibly.

The **plus**
makes the
difference
