INSTALLATION VIDEOS

SpeedFIX compression fitting

With HUMMEL compression fittings, pipes and fittings can be securely connected in just three steps: Attach, tighten, fix

Steel pipe adapters

Steel pipe adapters are ideal for mounting radiators or other fittings to existing connections: no welding, no thread cutting.

Emergency service case

With the emergency service case, plumbers have compression fittings for all common pipe types on board and are thus prepared for all eventualities.

Diverters

When changing radiators, there is always the problem of a reversed flow and return. Diverters ensure the correct direction of flow.

Flexible radiator connections

This popular problem solver is always used when the pipe spacing to the new radiator no longer fits. For installation ranges from 65 to 410 millimetres.

Steel pipe adapter for drinking water systems

This steel pipe adapter is DVGW-certified and thus meets all hygienic requirements for safe use in drinking water systems.

For heating and drinking water systems

Connection solutions from HUMMEL AG can be used in both heating and drinking water systems. The products are made of UBA-compliant materials and thus fulfil relevant hygiene requirements of the Federal Environment Agency. The range includes compression fittings, connection parts, nipples and steel pipe adapters.

One solution for two systems — this principle brings numerous advantages:

- // More safety for the craftsman
- // No risk of confusion on the construction site
- // Simple and uncomplicated procurement
- // Lean and clear stock-keeping
- // Simple assembly without special tools in both systems

These problem solvers belong in every service van

Every tradesman knows the situation: emergency service call! After a pipe burst, a leak must be sealed; pipe type and pipe dimension are not known. If you have HUMMEL problem solvers in your service van in such situations, you can provide a quick solution. With compression fittings and connection parts, HUMMEL has the right solution in its range for almost every type of pipe.

However, renovations can also pose problems. Pipe transitions, height compensations or different distances are common challenges for all renovators.

Differing distances

- // Excenter for connection fittings
- // Flexible radiator connections
- // Reductions

Different pipe connections

- // Compression fittings MKV-K, MKV-M, SpeedFIX
- // For plastic, composite and metal pipes
- // Connecting parts and nipples

Height compensation

- // Cone adapters
- // Telescopic connections
- // Extensions for connection fittings

Interchanged flow and return

- // Deflection pieces
- // Straight-through or corner form
- // For one and two pipe systems

MKV-K: 28 new renovation sets

These renovation sets belong in every service vehicle! They offer the right bolting solution for more than 70 different plastic and metal composite pipes. All common pipe diameters and wall and wall thicknesses are covered.

The way to the right solution is very simple. The specially developed, free MKV app is the ideal product finder: measure the pipe, enter the values, display the appropriate set, call up the data sheet and forward it if necessary.

The new fitting sets are specially designed to meet the needs of tradesmen in renovation work. The resealable packaging contains 10 multi-range compression fittings plus a suitable calibration tool. This pre-treats the pipes so that a secure and permanently reliable connection is guaranteed.

MKV-K Finder: The app for all cases

Quick and easy to find the right connection solution. It's so easy with the HUMMEL app: measure the pipe, enter the values, display the suitable connection solution and, if required, send it straight to your preferred dealer. The great thing about it: it works from anywhere. Whether on the construction site, in the service van, in the workshop or in the office.

Step 1: Measure

Simply measure the outside and inside diameter of the pipe to be processed with a caliper gauge

Step 2: Enter values

Open the HUMMEL app on your smartphone or PC. Transfer values to the input mask

Step 3: Display results

At the touch of a button, the desired solution appears with all the necessary technical information

Step 3: Display results

The technical data sheet is simply sent by e-mail to the preferred dealer

easy product selection with the MKV-App

Prepared for all eventualities

Emergency service in the plumbing, heating and air-conditioning trade can quickly become an exceptional situation. A burst pipe at the weekend or on a public holiday, a leak in a rare type of pipe, damage in a hard-to-reach place - every tradesman knows these unforeseeable challenges.

It's good if you can then rely on the equipment in the service van. An indispensable component here: the HUMMEL emergency service case. This means that the tradesman always has the right compression fitting to hand. The range covers all common pipe sizes and types and thus always offers a quick solution for damaged areas.

The special feature here is that the compression fittings and connection parts can be used in heating systems as well as in drinking water systems. The products are certified according to the requirements of the Federal Environment Agency and thus fulfil all hygienic requirements for use in drinking water systems.

More safety in emergency service: a suitcase full of solutions

- // For heating and drinking water systems
- // MKV-K for plastic and metal composite pipes
- MKV-M for copper, precision steel and stainless steel pipes
- // Simple installation without special tools
- // Suitable even for hard-to-reach areas

Service case Steel pipe adapter: simple, safe, clean

When replacing a radiator or installing a fitting, no one has to weld or cut threads any more. With the right steel pipe adapter, installation is simple, safe and above all: a clean affair. The steel pipe adapter is simply pushed onto the dirt-free pipe and tightened. This works even in the tightest spaces and under difficult installation conditions.

The specially designed HUMMEL service case is clearly equipped with many variants and sizes of steel pipe adapters. There are versions for fittings with Eurocone, internal or external thread. This means that the fitter always has the required version to hand and is prepared for any installation situation on site.

This service case saves time and long journeys

- **11** 11 steel tube adapter variants
- // All installation solutions just a handle away
- ## High retention forces due to EPDM seal plus stainless steel claw
- // Maximum operating pressure: 10 bar
- // Operating temperature in heating systems: up to 120 °Celsius

The right solution for every pipe

Good news for all modernisers and renovators: HUMMEL offers compression fittings for all common pipe types on the market. Gone are the days when tradesmen had to search for suitable connection solutions.

28 renovation sets offer solutions for more than 70 different plastic and metal composite pipes. These are almost all pipe types on the market. These sets are especially aimed at the needs in renovation. The old pipes can be pre-treated with a special calibration tool. This creates the conditions for a perfect and safe connection solution. One set consists of 10 fittings and one calibration tool.

Compression fittings SpeedFIX

INFO

- // Set consists of 2 compression fittings
- // Preassembled and fixed
- // Clamping range 15mm
- // For copper, precision steel or (stainless) steel pipes with a wall thickness ≥1mm (according to DIN EN 1057, DIN EN 10305-2 and DIN EN 10312)
- // Low tightening torque (easy mobility)
- // Suitable for district heating
- // EPDM sealing element
- // Eurocone compatible

Material	Nickel-plated brass / Coated brass
Material moulded seal	EPDM
Material clamping ring	Brass blank

The right solution for every pipe

Good news for all modernisers and renovators: HUMMEL offers compression fittings for all common pipe types on the market. Gone are the days when tradesmen had to search for suitable connection solutions.

28 renovation sets offer solutions for more than 70 different plastic and metal composite pipes. These are almost all pipe types on the market. These sets are especially aimed at the needs in renovation. The old pipes can be pre-treated with a special calibration tool. This creates the conditions for a perfect and safe connection solution. One set consists of 10 fittings and one calibration tool.

Compression fittings SpeedFIX

INFO

- // Preassembled and fixed
- // Clamping range 15mm
- // For copper, precision steel or (stainless) steel pipes with a wall thickness ≥1mm (according to DIN EN 1057, DIN EN 10305-2 and DIN EN 10312)
- // Low tightening torque (easy mobility)
- // Suitable for district heating
- // EPDM sealing element
- // Eurocone compatible

Material	Coated brass
Material moulded seal	EPDM
Material clamping ring	Brass blank
Max. operating pressure	10 bar
Max. operating temperature 📶	120°C
Max. operating temperature ち	95 °C

ACCESSORIES, SPARE PARTS AND TOOLS

Spare parts

Flat sealing

Item-No DAD5-70B00A

for terminal block for one-pipe systems (until year of construction/catalog 2020), diverters, terminal block for two-pipe systems

0-Ring

Item-No TAX3-7G1620

for single connection, cam, Y-piece

Protective cap

Item-No DAK1-1MB30A

for thermostatic valve M30 x 1.5 mm

Valve insert

Item-No DAT1-CVS13A

for TBblock (until year of construction/catalog 2020), thermostatic valve (angled, corner or straight type), thermostatic valve Designtechnik (until year of construction/catalog 2020)

Valve insert

Item-No DAT1-CVS13B

for design fitting set no. 1 corner type and set no. 2 straight type (from year of construction/catalog 2021)

Valve insert

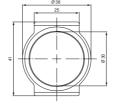

Item-No DAT1-CVS12B

for thermostatic valve Designtechnik, flow and returnflow reversed (until year of construction/catalog 2020)

Valve insert

for heating distributors

Item-No DAT1-HKV200

Valve insert

continuously adjustable valve terminal block Quadro

Item-No DAT1-QVS001

Flow rate controller

for heating distributors

Item-No DAT1-HKV100

TECHNICAL INFORMATION

General technical information

Heating parts for drinking water systems are particularly marked in this calalog. Our products are suitable for heating systems of buildings, regardless of the type of heating.

To avoid damage and scale formation, the composition of the heat transfer medium should conform to VDI (The Association of German Engineers) guideline 2035. For industry and district heating plants, the AGFW work sheet FW 510 is to be observed. Mineral oils contained in the heat-transfer medium (alternatively, Neo-Fermit and other lubricants of the type that contain mineral oil) cause swelling and, in most cases, the breakdown of EPDM sealings.

The threads of HUMMEL threaded joints are, unless stated otherwise, manufactured according to DIN EN ISO 228-1. We reserve the right to make technical changes, as well as changes to dimensions and design.

DIN EN 16313

HUMMEL single and double connection fittings comply with required figures of DIN EN 16313. HUMMEL compression fittings also comply with the functional dimensions of DIN EN 16313. By combining a HUMMEL compression fitting with a part from other manufacturers it has to be ensured that this part has been manufactured in compliance with DIN EN 16313.

Assembly instructions

Our assembly instructions are enclosed with our products or available online in our technical center at www.hummel.com. For further requests a personal contact person will be happy to provide you with detailed information.

DIN ISO 9001

HUMMEL supplies certified quality according to DIN ISO 9001 and sets with this high demands towards the own products, as well as towards the suppliers. Only standardized and certified copper alloys of well-known European semi-finished product plants getting used in production.

SOLUTIONS FOR HEATING AND DRINKING WATER SYSTEMS

Solutions for drinking water systems

Steel pipe adapters, compression fittings, connection fittings, nipples

Connection fittings

Reductions, coupling angle, steel pipe adapters, compression fittings

Radiator connections

Diverters, flexible connections, connection fittings, thermostatic valves and heads

Draining and Venting

Air vents, automatic venting, draining valves, inflow and outflow apparatus
